The true efficacy and value of medical devices, be they laser, LED or energy-based devices, can be well assessed by reviewing published papers from established users and researchers. We have organized our ever-increasing collection of articles by system and application, then each section is further divided into 3 categories, Peer Reviewed Articles, White Papers and Trade Journals, which allow you to see at a glance what has been published. Regulatory approvals vary by geographic region. Kindly refer to www.lutronic.com for system availability and the most recent article list.

**ACCUSCULPT – CLINICAL EFFECTS**

**Peer Reviewed Article**  

Comprehensive histologic analysis of interstitial lipolysis with the 1444 nm wavelength during a 3-month follow-up. SD Lim, UC Yeo et al. Histology and Histopathology, 2011;26:1375-1382.

Ablation efficiency and relative thermal confinement measurements using wavelengths 1,064, 1,320, and 1,444 nm for laser-assisted lipolysis. JI Youn, JD Holcomb. Lasers in Medical Science, 2013;28:519-527.

**Trade Journal**
